

NEWS RELEASE

TRENCH METALS EXPANDS HIGGINSON LAKE URANIUM PROJECT

Vancouver, Canada – January 25th, 2022 - Trench Metals Corp. (the “Company”) (TSXV: **TMC**, FWB: **33H2**) announces that it has expanded its Higginson Lake Uranium Project in northern Saskatchewan. The Company acquired an additional 3,589 hectares, more than doubling the size of the Higginson Lake Project, which now covers more than 5,900 hectares. The additional claims contain the same host rock and have many of the same geological markers as the core uranium mineralization identified on the Project and increase the potential for expansion of historic discoveries.

The Company acquired these additional claims as its technical team has identified that many of the trends that host the Company’s historic drill indicated reserve of 4,800,000 lbs of U308 continue onto these newly acquired claims.* The Company is currently working on establishing its 2022 exploration program, and will keep shareholders informed through future news releases. Dr. Peter Born, P.Geo., is the designated qualified person as defined by *National Instrument 43-101* and is responsible for, and has approved, the technical information contained in this release.

*The historical mineral resource estimate presented above used categories that do not conform to current Canadian Institute of Mining, Metallurgy and Petroleum Definition Standards on Mineral Resources and Mineral Reserves as outlined in National Instrument 43-101. A qualified person has not done sufficient work to classify the historical estimate as a current mineral resource and as such the Company is treating them as historical resource estimates. Readers are cautioned that the historical mineral resource estimate do not mean or imply that economic deposits exist on the project.

About Trench Metals Corp

Trench Metals Corp. is a mineral exploration company with a focus on uranium. We create value for our shareholders by engaging in promising mineral exploration opportunities. Our main goal is the advancement of various projects from discovery all the way to production. This vertically integrated strategy allows Trench Metals to achieve exceptional shareholder value through the entire life-cycle of the mining process.

Trench Metals Corp. has the right to acquire a 100% interest in two highly prospective uranium project in Saskatchewan’s Athabasca Uranium district. Higginson Lake Uranium Project which covers an area of approximately 5900 hectares and is 52 kilometers northeast of the town of Stony Rapids, which is accessible by Highway 905 and 964. The Higginson Lake Uranium Project host two historic drill indicated reserves, totaling 4,800,000 lbs of U308. And the Gorilla Lake

Uranium Project which comprises of nearly 7000 hectares in the Northern Mining District of Saskatchewan near the Shea Creek uranium deposit. The Athabasca District is home to the highest grade of uranium deposits in the world and accounts for 18% of global uranium production
